## **Nap Nanny Aims To Provide Sleep Safety**

**P**arents seeking a product that provides the utmost in children's sleep security need not look further. Baby Matters LLC's Nap Nanny is the perfect solution for improving the quality and safety of infant sleep.

The revolutionary patented product, which launched in 2008 and has since been updated, was designed by Leslie Gudel, a working mom whose baby would only sleep upright. Recognizing the hassle she and many other parents faced, Gudel designed the Nap Nanny to accommodate babies who have difficulty sleeping in a flat position because of reflux, colic, gas, ear infections and congestion.

The Nap Nanny sits at a 30-degree angle at the top and curves gently at the bottom, which creates an upright cradle that prevents sliding and eliminates fussiness, leading to a good night's sleep for babies and parents alike.

More information on the Nap Nanny can be found at booth 912 or on the company's Web site at [www.nap-nanny.com](http://www.nap-nanny.com).
